ABOUT US

Our vision is to offer architectural excellence and this epitomises everything we do..

Aspex offers you the opportunity to add some simplicity to your construction project, as the ultimate source for timber doorsets, risers, architectural ironmongery and access control. Benefit from finding your complete doorset package from one supplier, Aspex, greatly reducing the risk of specification conflict and non-conformance.

Our experienced project consultants can help you make well-informed decisions about your project. Speak to our team about design choices, industry standard or bespoke options, estimating & scheduling, sampling, optimised delivery plans and maintenance tips and more.

Our aim is to support you from design, manufacturing and maintenance, not just supply doorsets.

2006

Aspex was founded on a long-established family historic success and dedication within the architectural ironmongery industry

2010

Introduced access control and integrated systems division. Aspex are Platinum Inspired Business Partners of Salto and work closely with many other manufacturers to secure premises

2012

Introduced supplying timber doorsets working closely with carefully selected door manufacturers

2016

Introduced Novista concealed doorsets, pocket sliding doors and steel and timber risers

2019

Introduced manufacturing of timber doorsets in-house, primarily residential doorsets

2023

Extended factory by 40,000sqft to increase capacity and to bring the production of technical door leaves in-house; manufactured for education, healthcare and commercial sectors

COMMERCIAL

Offices, retail shopping centres, public transport, train stations, police stations

PERFORMANCE

Fire Rating - Ranging from FD30 up to FD120 in align with IFC Certification

PAS24:2016 Security Rated

Acoustic Rating up to 48dB Rw

Severe duty

Tested to BS EN 1192/DD171 classified as grade 4 severe duty & tested to BS EN 1191

DESIGN

Full height doors up to 3m
Over panels

EDUCATION

Primary and secondary schools, colleges, universities and student accommodations

PERFORMANCE

Fire Rating - Ranging from FD30 up to FD120 in align with IFC Certification

PAS24:2016 Security Rated

Acoustic Rating up to 40dB Rw

Severe duty

Tested to BS EN 1192/DD171 classified as grade 4 severe duty & tested to BS EN 1191

FEATURES

Safety and compliance guidance of Department for Education (DfE)
Finger protection mechanisms

HEALTHCARE

Hospitals, GP health centres, opticians and dentist practices, mental health units

PERFORMANCE

Fire Rating - Ranging from FD30 up to FD120 in align with IFC Certification

PAS24:2016 Security Rated

Acoustic Rating up to 48dB Rw

Severe duty

Tested to BS EN 1192/DD171 classified as grade 4 severe duty & tested to BS EN 1191

FEATURES

X Ray Doorsets
Anti Bacterial
Postformed doorsets

HIGH-PERFORMANCE
DOORSETS

CLASSROOMS, OFFICES, CONSULTING ROOMS

High-quality, durable doorsets available with vision panels and side screens to promote the transition of natural light into internal spaces.

PERFORMANCE

Fire Rating - Ranging from FD30 up to FD120
Fire rated and manufactured in accordance with the International Fire Consultants Third Party Certification scheme (IFCC)

Acoustic Rating -
Rating up to 40dB Rw

Severe Duty -
Tested to BS EN 1192/DD171 classified as grade 4 severe duty & tested to EN 1191 BM Trada certified

VISION PANELS

Standard vision panel style details, DDA compliant to BS 8300:2009

- Single narrow vision panel
- Single wide vision panel
- Narrow split vision panels
- Wide split vision panels
- Fully glazed
- Privacy blinds

STORE ROOM & CUPBOARDS

Resilient doorsets designed for high-traffic circulation and public spaces with attention to finish for durability, suitable design options for convenience.

PERFORMANCE

Fire Rating - NFR or FD30/FD60S Fire rated and manufactured in accordance with the International Fire Consultants Third Party Certification scheme (IFCC)

SPECIFICATION

Manufactured with a solid core

- Door leaf constructed from a severe duty core tested to DD171, with hardwood lippings on all 4 sides
- Standard sizes or bespoke available

DOOR FINISHES

Veneered
Laminated
PVC

ACCESS CONTROL

Standalone access controlled (Salto recommended)

NOVISTA STEEL RISERS

FRAME

Concealed/Picture frame design made from 1.2mm steel. 3 or 4 sided frame options

LEAF

Double skin 1.0mm Zintec Steel with glass wool insulated core. 48mm thick

CONFIGURATIONS

Single leaf, double leaf and up to six leaves within one frame

PERFORMANCE

Fire Rating - FD120(S)

Acoustic Rating - 41dB Rw (as standard)

Smoke/Air tested - To BS6375-1, BSEN1634-3 and to BSEN13501-2

Thermal Resistance - 1.43(m2K)/W

POPULAR CONFIGURATIONS

*More options available

INTU-FRAME OPTION

NOVISTA RISER STEEL

DRY-INTUMESCENT FRAME

Factory-fitted to riser frames, the dry intumescent seal expands behind the frame to seal tolerance gaps up to 15mm in event of fire, taking the place of fire foam. Fire rated to FD120

BI-DIRECTIONAL FIRE-TESTING

In line with current construction trends, Novista Risers are tested from both directions of attack from fire when fitted with intu-frame protection option

FLIP LOCK OPTION

NOVISTA RISER STEEL

CONCEALED LOCK

Flip lock hides chosen lock mechanism behind a flush hinged pocket.

FD60 fire rated and bi-directionally tested

NOVISTA TIMBER RISERS

FRAME

Concealed/Picture frame design made from 1.2mm steel. 3 or 4 sided frame options

LEAF

Solid core to suit application*

FD30, up to 2500mm high and 800mm wide leaves*
FD60, up to 2420mm high and 850mm wide*

CONFIGURATIONS

Single leaf & double leaf

PERFORMANCE

Fire Rating - FD30/60

Acoustic Rating - up to 35dB Rw

Smoke/Air tested - To BS6375-1, BSEN1634-3 and to BSEN13501-2

Thermal Resistance - Consult technical dept.

POPULAR CONFIGURATIONS

ACOUSTIC DOORS

This sound-proof door is supplied as a complete doorset. Ideal choice for areas requiring above average levels of sound insulation.

SPECIFICATION

- High Density GDC or solid timber laminated core
- Manufactured with a solid core, hardwood lipping on 4 sides. The door leaf is available either Laminated, Veneered, Factory Painted or Primed.
- 8mm hardwood lippings to all 4 sides. Lipping edge can match or contrast the face finish
- Overall thickness: 44mm (32dB), 54mm (35dB), 59mm (43dB), 84mm (48dB)
- Bespoke sizes -
930mm max (w), 2330mm max (h)

PERFORMANCE

- Fire Rating - NFR or up to FD120
- Acoustic Rating - 30dB to 48dB
- Tested to BS EN 1192 / DD171 and classified as grade 4 severe duty
- Manufactured to ISO 9001 standards

DOOR FINISHES

Veneered
Laminated
PVC

CONFIGURATIONS

Single, double, leaf & half
and other choices
Vision panel options

ACCESS CONTROL

Standalone access controlled (Salto recommended)

ACCESS CONTROL COMMUNAL

SMART SECURITY

SPECIFICATION

- Access control compatibility with various systems
- Overall thickness 54mm for NFR, FD30 and FD60
- Up to 35dB acoustic rated (with the correct seal arrangement)
- Tested to DD171 and classed as severe duty
- Choice of vision panel design options available

PERFORMANCE

- PAS24:2016 Security Rated (optional)
- Fire tested to BS 476 part 22
- All fire rated doorsets manufactured in align with IFC Certification scheme
- Doorsets meet requirements of Approved Doc M for clear opening widths

CONFIGURATION

- Single

STEEL DOORS (INTERNAL & EXTERNAL)

Quality, secure and certified steel doorsets representing strength and durability, and security features available. Suitable for internal and external use, fits well with residential and commercial spaces.

INTERNAL

- FD60, FD120, FD240
- Single or double configurations
- Panel options - solid, glazed, louved
- Custom-made in a choice of finishes
- Suitable for Masonry, Concrete and Flexible Stud wall

EXTERNAL

- General purpose external door
- Single or double configurations
- Variety of colours and finishes available
- Custom sizes available
- Hardware already fitted saving time & effort on site

SECURITY

- Intruder and blast security doors
- SECUR-DOR2: low to medium protection, suitable for residential
- SECUR-DOR3: medium protection suitable for residential to commercial
- SECUR-DOR4: medium to high protection

ACCESS CONTROL

Network access controlled (Salto recommended)

A photograph of an office hallway with dark grey walls and wooden trim. Two glass doors with wooden frames are visible. A white nameplate on the wall reads "Office 17". A blue circular sign with white text is also on the wall. A semi-transparent grey box is overlaid in the center of the image, containing the text "DESIGN OPTIONS FOR VISION PANELS".

DESIGN OPTIONS FOR
VISION PANELS

VISION PANELS

MINIMUM ZONES OF VISIBILITY

Many fire doors within education, healthcare and commercial sectors will include at least one vision panel per door leaf. The position of each vision panel must fall within the guidelines highlighted below to ensure of inclusivity where all types of users can benefit from the vision panel.

To ensure your fire doors are compliant with Building Regulations Part M: Mobility, we have provided a few diagrams to support correct design and specification criteria.

Please use these in conjunction with the latest building regulation codes to comply with compliance and relevant standards.

VISION PANEL OPTIONS

The vision panels shown are our most commonly used designs.

Alternative design options are available, subject to fire certification and minimum aperture margins.

Glazed bead dimensions and seal arrangements will vary depending on fire and acoustic certification.

In compliant with BS 8300 for wheelchair accessibility

FRAME TYPES

WITH UNIQUE FEATURES

A wide selection of different door frames can be supplied, manufactured from either MDF, softwood, hardwood, or steel, and each of these materials has its own unique advantages.

Standard lining, and stop or rebated frames, are available, together with specialist types for sports halls or finger protection choices.

FRAME TYPE ONE -
LINING AND STOP

FRAME TYPE TWO -
REBATED

FRAME TYPE THREE -
SPLIT WITH SEPARATE
ARCHITRAVES

FRAME TYPE FOUR -
REBATED WITH INTEGRATED
ARCHITRAVES

FRAME TYPE FIVE -
DOUBLE SWING

A wide-angle photograph of a modern operating room. The room is brightly lit with recessed ceiling lights and large surgical lamps. The walls are white, and the floor is a light-colored tile. In the center, there is a large, adjustable surgical light fixture with a control panel. To the left, there is a set of double doors with glass panels. To the right, there is a single door with a glass panel. On the walls, there are various medical equipment and control panels, including a whiteboard and a control panel with a clock and buttons. The overall atmosphere is clean and professional.

DESIGNED WITH CARE FOR
HEALTHCARE

POSTFORMED PVC DOORSETS

Postformed PVC doorsets are fully encapsulated with protective, specialist sheets enhancing the durability, better hygiene and ease of cleaning, and scratch-resistant. These doorsets are also anti-bacterial and suitable for 'wet room' areas.

FEATURES

- Specialistic protection for door frames
- Plastic layered protection maintains a clean safe environment
- Reduces maintenance costs by protecting the frame from damage
- Enhances durability of doorsets in bathrooms or leisure centre, protecting against the risk of swelling
- Optimises the safety of staff and patients in the event of a fire by maintaining fire integrity of the door allowing safe evacuation

PERFORMANCE

- Fire Rating - NFR, FD30, FD60 in align with IFCC Certification scheme Class and 'O' Fire Rated; tested to BS 476 Parts 6 & 7
- Compatible with fire and acoustic performance

DESIGN

- Available in any colour
- Vision panel option
- X-ray and electromagnetic protection option (NFR only)
- Purpose-made to sizes

SPECIALIST VISION PANELS
Designed for healthcare

SPECIALIST VISION PANELS

Designed for healthcare

ANTI-LIGATURE

High integrity glazing placed inside stainless steel frame, with tamper-proof screws, rounded corners and bevelled edge returns for optimal patient safety.

GLAZING OPTIONS

- Toughened Glass
- Laminated
- Fire Rated - FD30 and FD60
- Acoustic

HANDLE OPTIONS

- Key locking
- Thumbturn

SIZE OPTIONS

- Available in square and oblong
- Standard Sizes are:
404mm X 404mm and
800mm X 250mm
- Bespoke size available:
Width from 150mm to 1000mm;
Height from 200mm to 1500mm

MAX

Secure, triple glazed system allows secure observation whilst maintaining the appearance of a contemporary Venetian style blind.

GLAZING OPTIONS

- Toughened Glass
- Laminated
- Fire Rated - FD30 and FD60
- Acoustic
- Lead
- Laser* (restrictions may apply)

HANDLE OPTIONS

- Lever handle
- Key locking
- Thumb turn

SIZE OPTIONS

- Standard Sizes are: 404mm X 404mm
and 800mm X 250mm
- Bespoke size available*:
Width from 150mm to 1000mm;
Height from 200mm to 1500mm

MAX XL

Specifically designed for long and narrow placements and incorporates all the benefits of the original Vista Max.

GLAZING OPTIONS

- Toughened Glass
- Laminated
- Fire Rated - FD30
- Acoustic
- Lead
- Laser* (Restrictions may apply)

HANDLE OPTIONS

- Lever handle
- Key locking
- Thumb turn

SIZE OPTIONS

- Bespoke size available:
Width from 175mm to 500mm;
Height from 1100mm to 1500mm

SPECIALIST VISION PANELS

Designed for healthcare

LEAD & LASER PROTECTION

Hand-crafted vision panels with either lead glass or with a laser polymer shield, suitable for X-ray and radiotherapy spaces.

GLAZING OPTIONS

- Toughened Glass
- Laminated
- Fire Rated - FD30 and FD60
- Acoustic
- Lead
- Laser* (restrictions may apply)

SIZE OPTIONS

- Standard Sizes are: 404mm X 404mm and 800mm X 250mm
Bespoke size available*:
Width from 150mm to 1000mm;
Height from 200mm to 1500mm

CODE GLASS

For X-ray and radiotherapy spaces, Code 4 lead glass (2.1mm L/E @ 150Kv) is a standard, and code 4 - 8 available too.

BLACKOUT

Viewing aspect remains the same while the panel is open but when closed, 97-98% light is filtered out, ideal for patient bedrooms, laboratories etc.

GLAZING OPTIONS

- Toughened Glass
- Laminated
- Fire Rated - FD30 and FD60
- Acoustic
- Lead
- Laser* (restrictions may apply)

HANDLE OPTIONS

- Lever handle
- Key locking
- Thumb turn

SIZE OPTIONS

- Standard Sizes are: 404mm X 404mm and 800mm X 250mm
- Bespoke size available*:
Width from 150mm to 1000mm;
Height from 200mm to 1500mm

Blackout with colour options to match your interior. Working with standard RAL colours allows a good colour match to be achieved

Blackout in matching texture: Provide a veneer/wood texture laminate sample which can be scanned & printed onto the glass to match

SPECIALIST VISION PANELS

Designed for healthcare

FLUSH

Vision panels are often required in areas where the potential spread of bacteria is a threat. The Vista Flush is an ideal solution as the panel has no beading and fits smoothly within a door. It eliminates rebates and crevices, providing an easy-to-clean surface area with no protrusions.

GLAZING OPTIONS

- Toughened Glass
- Laminated
- Fire Rated - FD30 and FD60
- Acoustic
- Lead
- Laser* (restrictions may apply)

HANDLE OPTIONS

- Lever handle
- Key locking
- Thumb turn

SIZE OPTIONS

- Standard Sizes are: 404mm X 404mm and 800mm X 250mm
- Bespoke size available*:
Width from 140mm to 400mm;
Height from 200mm to 800mm

VISTA-ART

With VistaArt vision panels, any type of custom graphics can be printed to the panel from calming to colourful designs, logos or graphics. In facilities treating mental health, and dementia patients in particular, it assists them therapeutically due to the calming nature of art.

GLAZING OPTIONS

- Toughened Glass
- Laminated
- Fire Rated - FD30 and FD60
- Acoustic
- Lead
- Laser* (restrictions may apply)

HANDLE OPTIONS

- Lever handle
- Key locking
- Thumb turn

SIZE OPTIONS

- Standard Sizes are: 404mm X 404mm and 800mm X 250mm
- Bespoke size available*:
Width from 150mm to 1000mm;
Height from 200mm to 1500mm

SPECIALIST VISION PANELS

Designed for healthcare

INTEGRAL BLINDS

Provide large-scale observation as well as privacy and shading. Hermetically sealed between two panels of glass, makes it easy to maintain as fully-sealed unit protects from moisture, dust, dirt and odours.

Cordless with the ability to have dual control, suitable for doors, screens, sidelights, partitions etc.

Available in both magnetic and motorised operation.

GLAZING OPTIONS

- Range of glazing options including fire-rated and noise reduction available

SIZE OPTIONS

- Bespoke size available:
2500mm high x 2000mm wide

SLIDE

Vista Slide is perfect for doors where greater observation is needed as well as walls/partitions to monitor corridor

GLAZING OPTIONS

- Toughened Glass
- Laminated
- Fire Rated - FD30 and FD60
- Acoustic
- Lead
- Laser

Stair 1

DESIGN FEATURES
& FINISHES

DESIGN FEATURES

BI-FOLDING

Bi-folding doors can be sliding or folding to enhance functionality and access, ideal solutions when space is limited. This innovative two-leaf interconnected door solution reduces door swing area while maximising clear opening widths, in align with Approved Document M and BS 8300:2001.

Bi-folding doors are recommended for outward opening WC doors, door openings onto landings, lobbies with space required for wheelchair access, sanitary accommodation doors opening outward onto circulation spaces etc.

These smart bi-folding door solutions can be NFR or FD30 in align with IFC certification and BS476 Part 22 1987, and they are fire and smoke resistance.

DOUBLE-ACTION

Double-action doors, also known as double-swinging doors, are practical door solutions that can swing in both directions enhancing convenience.

These solutions are most commonly used in hospitals, healthcare clinics, where the door must open in both directions in the case of emergencies allowing staff and patients fast, smooth movement.

For example, if someone is in distress and locked in a room then the door cannot open inwards because it is blocked, these doors can be opened outward too allowing assistance and care to be provided to the person. Also, an ideal solution for disabled toilet doors that need to be able to open inwards and outwards.

FINGER PROTECTION

Safehinge is a smart, protective finger safe protection solution preventing crushing and shearing of fingers (suited for both adults and children).

The system's sleek design integrates perfectly with the door and frame making it the most unobtrusive finger protection system available. The aluminium profile that fits onto the edge of the door has an integral pivot and top centre for single or double action doors. If the doors are required to self-close, a standard overhead door closer can be used on single swing doors and a floor spring or transom closer on double swing doors.

This solution is suitable for single or double action doors, fire tested with FD30 or FD60 doors with acoustic rating up to 38dB (glazed doors) They are fully compliant with Approved Documents and can be incorporated into all design applications, in align with severe duty DD171.

PVC choices

Choose impact-resistant, highly hygienic PVC surfaces ideal for clean rooms, washrooms and laboratories.

HEALTHCARE

High-performance, durable and smart ironmongery available in suitable finishes including stainless steel, aluminium, nylon.

Washroom and WC fittings designed for disabled users include stainless steel, nylon and aluminium powder coating.

EDUCATION

Resilient, quality and innovative ironmongery with finger protection, anti-bacterial and sophisticated features. Most suited stainless steel, aluminium, nylon finishes available. Robust nylon helps add pop of colour and does not chip or flake off. Braille and tactile signage available too.

COMMERCIAL

Quality, functional ironmongery with attractive aesthetics available in a variety of finishes from stainless steel to black, in adherence to relevant standards.

ACCESS CONTROL

SMART, INNOVATIVE SOLUTIONS

Aspex are a proud Platinum Inspired Business Partner of Salto offering seamless, relevant and efficient solutions.

As a dedicated solution provider, we offer the complete package from - supply, installation and maintenance support.

We work a range of leading manufacturers...

SALTO

ASSA ABLOY

Paxton

OMNITEC

alhua

HIKVISION

ESCUTCHEONS

XS4 One Escutcheons need no hard-wiring, battery-operated. All-in-one smart lock designed to fit on any door type & retrofits.

WALL READERS

Smart wall readers integrate with any type of access control application - doors, barriers, lifts, electronic gates etc.

TURNSTILES

Manage crowd-control, prevent tailgating with smart turnstiles. Integrated with building access control system

AUTOMATED DOORS

Control of automated doors integrated with access control, fire alarm systems and supporting disability access

PANIC EXIT BARS

Highest safety standards with ease of use. EN1125 compliant in combination with Salto XS4 electronic escutcheon

CAR PARK BARRIERS

Seamless integration with existing management systems. ANPR car park barrier, intercom features, keyless access possible
